

Data Scientist

Company: AnalyticsPro

Position: Data Scientist

AnalyticsPro is seeking a talented Data Scientist to help us extract insights from complex datasets and build predictive models that drive business decisions.

Job Description:

We are hiring a Data Scientist to work on cutting-edge machine learning projects. The ideal candidate will have strong programming skills and experience with statistical analysis.

Responsibilities:

- Develop and implement machine learning models using TensorFlow and Scikit-learn
- Analyze large datasets using Python, Pandas, and NumPy
- Create data visualizations and dashboards using Tableau
- Work with SQL databases for data extraction and manipulation
- Collaborate with cross-functional teams to understand business requirements
- Present findings and recommendations to stakeholders

Technical Skills Required:

- Python, Machine Learning, TensorFlow, Pandas, NumPy, SQL, Tableau, Scikit-learn, Jupyter

Experience Level: 2-4 years in data science or analytics role

Education Requirements: Master's degree in Data Science, Statistics, Mathematics, or related quantitative field

What We Offer:

- Competitive salary and benefits
- Opportunity to work on diverse projects
- Professional development and training
- Collaborative work environment
