Key Responsibilities:

- Design and develop scalable web applications using Python and Django
- Implement RESTful APIs and microservices architecture
- Work with PostgreSQL databases and optimize query performance
- Deploy applications on AWS infrastructure using Docker containers
- Collaborate with frontend developers using React and JavaScript
- Write clean, maintainable code following best practices

Required Skills:

- Python, Django, PostgreSQL, AWS, Docker, Git, REST APIs, JavaScript, React

Minimum Experience: 3-5 years of software development experience

Education: Bachelor's degree in Computer Science, Engineering, or related field

Preferred Qualifications:

- Experience with cloud platforms (AWS/Azure)
- Knowledge of containerization technologies
- Understanding of agile development methodologies
- Strong problem-solving and analytical skills
